

EPCC 5 – June 13-16, 1999 Heviz, Hungary

- **Voltage and Reactive Power Control**
 - Voltage/Var Scheduling
 - Automatic Voltage Control
 - Hierarchical Voltage Control Strategies
 - Preventive and Emergency Measures for Voltage Security
- **Electricity Trading Issues**
 - Transmission Pricing Models
 - Decision Support Tools for Trading
 - Trading Mechanism
 - Risk Management Tools
 - Power Exchange Scheduling and Coordination
- **Security Control in the Restructured Power Industry**
 - Decision Tools for Grid Operation/Independent System Operation
 - Available Transmission Capacity: Static and Dynamic
 - Congestion Management
 - Ancillary Services
- **Information Technology in Utility Networks**
 - Information Network Structures
 - Distributed Databases & Data Warehousing
 - Communication Protocols
 - Application of Web Technology
 - Data Security
- **Application of Object Technology in Control Center Design**
 - Distributed Objects
 - CORBA Applications
 - COM Applications
 - Interoperability
 - Application Programming Interfaces
 - Object Oriented Databases
 - Middleware
 - Object Programming
