

**The 15<sup>th</sup> International Workshop on Electric Power Control Centers  
Reykjavik, Iceland, May 12-15, 2019**

**How might the control center look like in the future?  
vision from an R&D perspective**

**Prof.dr.techn.ir. Sonja Berlijn**

Statnett

How will the control center look like in the future when there are so many emerging strategic technologies are under rapid development? How can and how will for instance 'autonomous things' such as robots and drones, 'augmented analytics', 'AI driven development', 'digital twins', 'empowered edge', 'immersive experience' and 'smart spaces' influence our vision and by that the design and functions of the control center of the future? It is only our imagination and our ability to perform R&D and innovation that will set the limits.
