

**The 15th International Workshop on Electric Power Control Centers
Reykjavik, Iceland, May 12-15, 2019**

Digital Grid Service Portfolio

Theo Borst

DNV GL

Sponsors/Vendors Panel

Abstract:

DNV GL digital grid service portfolio includes services related to SCADA/EMS/DMS replacement, substation automation, power system verification as well as services related to software technology and data analytics. We will be focusing on data management and analytics in the energy industry, including topics such as predictive maintenance, digital twin, power cybernetics and safety of AI systems.

Our presentation will be followed by a Q&A session.
